SUPPLEMENTARY INFORMATION: Each year cable systems must submit royalty payments to the Register of Copyrights as required by the statutory license set forth in section 111 of the Copyright Act for the retransmission to cable subscribers of over-the-air television and radio broadcast signals. See 17 U.S.C. 111(d). The Copyright Royalty Judges (Judges) oversee distribution of royalties to copyright owners whose works were included in a qualifying transmission and who timely filed a claim for royalties. Allocation of the royalties collected occurs in one of two ways. In the first instance, the Judges may authorize distribution in accordance with a negotiated settlement among all claiming parties. 17 U.S.C. 111(d)(4)(A). If all claimants do not reach agreement with respect to the royalties, the Judges must conduct a proceeding to determine the distribution of any royalties that remain in controversy. 17 U.S.C. 111(d)(4)(B). Alternatively, the Judges may, on motion of claimants and on notice to all interested parties, authorize a partial distribution of royalties, reserving on deposit sufficient funds to resolve identified disputes. 17 U.S.C. 111(d)(4)(C), 801(b)(3)(C).

On January 21, 2015, representatives of the Phase I claimant categories (the “Phase I Claimants”)¹ filed with the Judges a motion requesting a partial distribution amounting to 60% of the 2013 cable royalty funds pursuant to section 801(b)(3)(C) of the Copyright Act. 17 U.S.C. 801(b)(3)(C). That section

¹ The “Phase I Claimants” are Program Suppliers, Joint Sports Claimants, Public Television Claimants (represented by Public Broadcasting Service), Commercial Television Claimants (represented by National Association of Broadcasters), Music Claimants (represented by American Society of Composers, Authors and Publishers, Broadcast Music, Inc., and SESAC, Inc.), Canadian Claimants Group, National Public Radio, and Devotional Claimants. In what has become known as Phase I of a cable royalty distribution proceeding, the Judges allocate royalties among certain categories of claimants whose broadcast programming has been retransmitted by cable systems. The Phase I Claimants who are the moving parties in this requested partial distribution represent the traditional claimant categories. The Judges have not and do not by this notice determine the universe of claimant categories for 2013 cable retransmission royalties. In Phase II of a cable royalty distribution proceeding, the Judges determine how the allocated royalties are to be distributed among claimants within each of the Phase I categories.

requires that, before ruling on the motion, the Judges publish a notice in the **Federal Register** seeking responses to the motion for partial distribution to ascertain whether any claimant entitled to receive the subject royalties has a reasonable objection to the requested distribution. Accordingly, this Notice seeks comments from interested claimants on whether any reasonable objection exists that would preclude the distribution of 60% of the 2013 cable royalty funds to the Phase I Claimants. Parties making objection to the partial distribution must advise the Judges of the existence and extent of all objections by the end of the comment period. The Judges will not consider any objections with respect to the partial distribution motion that come to their attention after the close of the comment period.

The Judges have caused the Motion of the Phase I Claimants for Partial Distribution to be posted on the Copyright Royalty Board Web site at <http://www.loc.gov/crb>.

Dated: February 26, 2015.

Suzanne M. Barnett,

Chief U.S. Copyright Royalty Judge.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing Interim Staff Guidance (ISG), OL/FR-ISG-2014-01, "Reviewing and Assessing the Financial Condition of Operating Power Reactor Licensees, Including Requests for Additional Information," dated February 17, 2015. The ISG provides clarifying guidance to the NRC staff when reviewing licensee financial information, and when requesting additional information regarding licensee financial conditions, as authorized under the NRC's regulations. Such review and inquiry are performed by NRC staff for currently operating power reactor licensees, absent a licensing action such as a license transfer.

SUPPLEMENTARY INFORMATION:

I. Discussion

The purpose of this ISG is to clarify the process by which the NRC will review financial conditions of, and financial concerns about, currently operating power reactor licensees. This guidance is intended to provide consistency and transparency with regard to the NRC's financial review process for licensees (in the absence of a license transfer or other similar licensing action). It addresses the NRC's basis for financial Requests for Additional Information from licensees during operations, the NRC staff's evaluation of Requests for Additional Information responses, and the closure

of such inquiries. This ISG is intended to enhance the NRC's financial review guidance presented in Section III(1)(d)—Post-OL Non-transfer Reviews, of NUREG-1577, Revision 1, "Standard Review Plan on Power Reactor Licensee Financial Qualifications and Decommissioning Funding Assurance," dated December 2001, (ADAMS Accession No. ML013330264). The guidance in this ISG will be included in the next update to NUREG-1577.

II. Backfitting and Issue Finality

The NRC is issuing interim guidance for the NRC staff regarding its review of operating power reactor licensees' financial information. Issuance of the ISG does not constitute backfitting as defined in § 50.109 of Title 10 of the *Code of Federal Regulations* (10 CFR) (the Backfit Rule) and is not otherwise inconsistent with the issue finality provisions in 10 CFR part 52. The NRC's position is based upon the following considerations.

1. *The ISG positions do not constitute backfitting, inasmuch as the ISG is internal guidance to NRC staff.*

The ISG provides interim guidance to the NRC staff on how to review licensees' financial information and request additional financial information. Changes in internal staff guidance are not matters for which applicants or licensees are protected under 10 CFR 50.109 or issue finality provisions in 10 CFR part 52.

2. *The NRC has no intention to impose the ISG on existing nuclear power plant licenses either now or in the future (absent a voluntary request for change from the licensee).*

The NRC staff does not intend to impose or apply the positions described in the ISG to existing (already issued) licenses (e.g., operating licenses and combined licenses). Hence, the ISG—even if considered guidance which is within the purview of the issue finality provisions in 10 CFR part 52—need not be evaluated as if it were a backfit or as being inconsistent with issue finality provisions.

Even if, in the future, the NRC staff seeks to impose a position in the ISG on holders of already issued licenses, such imposition would not provide any basis for the Backfit Rule or issue finality provisions to apply. The ISG concerns, in part, the NRC's request for operating power reactor licensees' financial information. Information collection and reporting requirements such as these are not subject to the Backfit Rule and issue finality provisions.
