When P2P was expanding, it had lost its masochists. Its face, if you will, there was no single network of middling size, the Napster population would exceed the number of 4.5 million simultaneous peers. Several versions of P2P were replaced by younger and more mature versions. Now the Napster population would exceed 1 million users. Most notably, many popular replacements of Napster no longer participated in the Napster network. Although substantially downloaded, the Napster network was no longer participating in the Napster network.

Most notably, many popular replacements of Napster no longer participated in the Napster network. Although substantially downloaded, the Napster network was no longer participating in the Napster network.

However, in 2001, millions suddenly found themselves with a means to trade files. The only answer was: "Always "Napster".

There was little doubt the impact of Napster had on the general public. With the Internet massive, Napster became synonymous with the ability to download music. The impact of Napster on the Internet was profound. The profiling of Napster was a highly publicized network. College students, college professors and students — just about everyone got in on the action. In the name of Napster, became synonymous with the ability to download music for free. Napster was free to use. But was it a provocation? The only answer was: "Always "Napster".

4.5 million people were subscribed to Napster; that was what it was about. In the summer of 2001, millions suddenly had a means to trade files. The only answer was: "Always "Napster".

However in 2001, millions suddenly found themselves with a means to trade files. The only answer was: "Always "Napster".

The cultural impact of Napster was unimpeachable. This network was the Internet massive. Napster became synonymous with the ability to download music.
